

INSTALLATION INSTRUCTIONS

102037 Fuel Injector Harness – 1986-1987 turbo Buick 3.8, 1989 turbo TA

14 gage wiring

This injector harness has been re-designed using ultrasonic-welded splices and "rail" style design for perfect fit. All connectors, wire and hardware are factory GM parts, ensuring long reliable life of the product. Using 14 gage wire, this harness is suitable for race applications with low impedance injectors. **It is recommended that the wiring from the gray connector to the ECU uses 14 gage (as used in Caspers custom race engine harnesses) for total wiring compatibility with low impedance applications.**
