

# INSTALLATION INSTRUCTIONS

## 108156 Wideband Extension Adapter Kit

This extension is designed to adapt the XFI or FAST wiring harness connector (supplied on the FAST or XFI adapter) to your NTK WBO2 sensor using a 6 ft. (72 in.) extension length. This adapter is furnished with the adapter-end connector removed to facilitate installation through the firewall - using a grommet or other suitable opening. Once installed, the connector is then installed using the pinout illustration below. Use care in installing the seven terminals into the connector and be sure to install the seal retainer onto the rear of the connector after completion. (Sensor not included in kit).

# 108156

**Insert terminals as shown**

- A - BLK**
- B - WHT**
- C - RED**
- D - empty**
- E - GRAY**
- F - BLUE**
- G - YEL**
- H - ORG**
